CAURUM was born from creativity, passion, excellence and exclusive know-how to be a leading international company in the chemical sector.

CAURUM is specialized in refining, transformation, production and conversion of precious metals, and gives them added value through their trading.

The company deals with the effective recovery of Gold, Silver, Platinum, Palladium, Rhodium, Ruthenium, Iridium, making the waste a renewable and inexhaustible source through eco-innovative models, in the perspective of an incessant research, development and commitment to the environmental sustainability.

CAURUM, driven by a deep desire for innovation and experimentation, in 2021 built its identity, expanding its production processes and investing in new cutting-edge systems, redesigning and rethinking the core business of the company with a focus on the future generation.

CAURUM, in the context of a sustainable holistic approach and the promotion of the circular economy, has distinguished itself by conquering important milestones certifications: Responsible Jewellery – RJC, Chain of Custody (CoC) and Code of Practices (CoP).

As a certified member, CAURUM has been recognized for its commitment to responsible activity and a sustainable business path, providing the guarantee of the integrity of its products and materials.

All the precious metals that go through the company comply with RJC, Chain of Custody (CoC) and Code of Practices (CoP), 100% recycled.

These certificates offer customers and suppliers the guarantee of a safe supply chain, from origin to final treatment, respecting human rights, protecting the environment and fulfilling all correct management practices.

Product integrity, competence, transparency, social responsibility, ethical work and the trust of our customers are the pre-eminent and shared values at the center of our vision.

CAURUM has implemented a quality, environmental and safety management system compliant with ISO 9001, ISO 14001 and ISO 45001 standards, respecting the environment and workplace safety.

The certification process was successfully concluded in May 2023. Furthermore in May 2024 CAURUM has obtained ESG rating by Cerved.
