

# HXU23E.104.006

## Cross-cut, Micro-fissure bur in Monobloc Tungsten Carbide

- 0.6 mm max diameter with a tip diameter of 0.18 mm.
- Recommended for interproximal areas, can be used on metal, ceramic, composite, and resin.
- Also appreciated by jewelers for working in small spaces or corners.
- Recommended to use at high speed and with low operational pressure.
