EXPERT MANUFACTURER OF POLISHING SOLUTIONS

HRLINE

HRLine polishing compounds are formulated with a **vegetable binder**, containing no animal fats, meeting the expectations of the **most demanding markets** in an **eco-responsible way**.

Exceptional mirror finish on a wide range of materials. Appreciated for their **high polishing efficiency** and **quick results**.

An external study shows that the **full cleaning time with HRLine compounds** is **4x faster** than using a standard finishing compounds of the market. This represents a **significant time saving**, and a **cost reduction** (detergent, energy, etc.).

HRLine polishing compounds combine **performance**, **respect of the environment**, **ease of use** and **fast cleaning**, making them the ideal choice for optimising your polishing processes.

**FOR FAST and COMPLETE CLEANING,
USE LUXOR CLEAN →**

Cleaning solution for ultrasonic baths
1, 5 or 25 liters

TESTING PROTOCOL

Tests carried out on precious metal parts with grooves of various diameters and depths, representing the most delicate areas to be cleaned after polishing. The polishing compound was applied to the part, then scraped off before drying for one hour at room temperature. The part is then cleaned, upside down, for 15s at 3% EDV, 60°C without stirring and under ultrasound. The baths were repeated until all compound residues were removed. Each test is repeated 3 times.

MADE IN FRANCE

All our compounds & mops solutions are developed in our R&D workshop and manufactured on our production site in France.
