

INNOVATION IN JEWELLERY SOLDERING

A close-up photograph showing a person's hand in a white nitrile glove holding a black syringe. The syringe is labeled 'XBRAX' and '668-772'. It has a red plunger and a fine needle. The hand is applying a small amount of red soldering paste from the syringe onto a silver electronic component that is being held by a pair of tweezers. The component is being placed on a tan-colored breadboard. In the background, there are other components already soldered onto the breadboard. The text 'XBRAX®: SOLDERING PASTES' is overlaid in white on the center of the image.

XBRAX®: SOLDERING PASTES

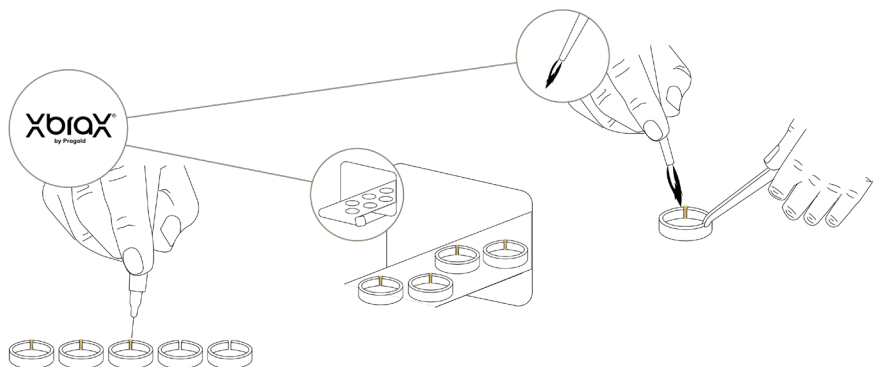

XBRAX®

XBRAX® is the specific range of **precious metals alloys solder pastes** for the **assembly and repair of gold, silver and platinum jewellery**.

XBRAX® is suitable for use both in **furnaces** and **benchwork** with a torch.

XBRAX® offers the advantage of perfectly **replacing traditional soldering techniques** with wire and sheets, guaranteeing lower **working temperatures**, better **wettability**, reduced use of **filler alloy**, and a perfect **colour match**.

XBRAX® is a **ready-to-use product**, and thanks to its semi-liquid consistency it can be placed at specific and precise points for joining, allowing the welding of surfaces, that would otherwise be difficult to reach.

The result is an extremely **precise and high-quality weld**.

The XBRAX® product range is available in 917‰ and 875‰ yellow gold alloys; 750‰, 585‰, 417‰ and 375 ‰ nickel-free yellow and white gold alloys; 750‰ red gold alloys; 925‰ silver alloy; 950‰ platinum alloys.

The entire XBRAX® range is produced using only ethical gold and silver according to the **RJC - CoC standard**. In addition, gold, silver and all other metals come from recycled sources for a 100% recycled end product (ISO 14021 certified).

prexo®
by Progold

PREXO® is the practical **hand dispenser** ideal for the optimal **application and use of XBRAX® solder pastes**. It is easy to use, durable and ergonomic.

PREXO® guarantees greater precision and accuracy of soldering, thanks to the **manual sensitivity** that the goldsmith can experience when positioning and disposing the solder paste on the jewel.
